

JUAN HELBERT

I am an Information Systems Engineer, passionate about learning, solving problems and working as part of a team. I like to create clean code, research new technologies and grow up in the process. I am always looking for new challenges.

WORK EXPERIENCE

Front-end React developer

May 2019 – Current

[Agrofy](#), Rosario, Argentina

I arrived to Agrofy to develop a news platform about agriculture and livestock in React. The project began to develop from scratch, which allowed me to know and familiarize myself with the technology in depth and learn a lot about its life cycle and its little "tricks".

Front-end Magento 2 developer

June 2018 – April 2019

[Brandlive](#), Buenos Aires, Argentina

I was the main developer of an e-commerce application based on Magento 2, a software that uses relational MySQL/MariaDB databases, PHP programming language and Zend Framework elements. My goal was to make sure that all elements of the store looked visually correct, adjusting them if they didn't match the design approved by the customer.

Front-end Magento 1 develop

November 2017 – April 2019

[EcloudSolutions](#), Rosario, Argentina

I started here while I was studying, without any knowledge of Magento or frontend technologies. Day by day I was learning and gaining the trust of the team. The last few months, I was in charge of teaching magento to the new developers coming to the company. Although I was developing code for Brandlive, I was still part of the Ecloud Solutions team and helped with some difficult task.

More details about my work experience [clicking here](#).
